

# DMX/Power combined cable ECO-Line, XLR5/ powerCON

3 x 1.5mm<sup>2</sup> + 2 x 0.25mm<sup>2</sup>, 50m

Sample picture

- Assembled and tested by our in-house master workshop

With the Major DMX/Power combined cable ECO-line it is possible to send power (via powerCon plug) as well as DMX data (via XLR5 plug). The cable is robust and flexible. By using the combined cable for power and DMX it is easy to reduce the setup time.

They are manufactured in Major's own workshop. Each cable is checked individually before leaving the workshop. Major ECO-Line cables offer an optimised price-to-performance ratio.

## Technical specifications

length	50 m
