

# DMX/Power combined cable, XLR5/powerCON TRUE1

3 x 1.5mm<sup>2</sup> + 2 x 0.25mm<sup>2</sup>, 0.5m, with print

sample picture

With the Major DMX/Power combined cable it is possible to send power (via powerCON TRUE 1 plug) as well as DMX data (via XLR5 plug). The cable is robust and flexible. By using the combined cable for power and DMX it is easy to reduce the setup time.

They are assembled in Major's own workshop. Only components from well known manufacturers are used. Each cable is checked individually before leaving the workshop.

Major offers the customisation of this cable with lettering and graphics. Please contact us for further details.

- Assembled and tested by our in-house master workshop
- Custom designs on request
- Only high-quality components used
- Customisation with lettering possible

## Technical specifications

length	0,5 m
